***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 13-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Nitta et al.

Nitta et al discloses a video recording apparatus that shows all the limitations recited in claim 13, including the feature of encoding a video program into a compressed digital data with a variable bit rate (See Nitta et al's Figure 1, component 1), the feature of controller for adjusting during the encoding the bit rate depending on a remaining part of the data space and on a remaining part of the duration of the program and the complexity of at least a part of the program determined during the encoding as specified in the present claim 13. Applicant's attention is directed to Nitta et al's Figure 1, component 1, and 11-13, where it is shown that the encoding process is adjusted based remaining part of the memory space of the disk, the duration of the program (such as the recording time of the program) and the complexity of the program (such as the quality of the program). (See Nitta et al's column 3, lines 32-25).

With regard to claims 14-18, it is noted that these claims recite substantially the same limitations recited in claim 13 and are, therefore, rejected under the same rationale.

**Conclusion**
